WELCOME TO MY PORTFOLIO

Hi, I'm Deepesh Kumar

Aspiring DevOps Engineer & Data Analyst

I am passionate about DevOps, Cloud Technologies and Data Analytics. I work with Linux, Git, Docker, AWS, SQL, Python, Power BI, Excel and Tableau.

ABOUT ME

DevOps & Data Analytics Enthusiast

I am an aspiring DevOps Engineer and Data Analyst with a strong interest in cloud technologies, automation, data analysis and visualization.

I have hands-on experience working with SQL, MySQL, Advanced Excel, Python, Power BI and Tableau for data analysis and dashboard development.

Along with analytics, I am learning Linux, Git/GitHub, Docker, AWS and DevOps practices to understand how applications are developed, containerized and deployed.

TECHNICAL SKILLS

My Technology Stack

SQL & MySQL

Joins, Subqueries, CTEs, Window Functions, Aggregations, Group By, Having and data analysis using MySQL.

Advanced Excel

VLOOKUP, XLOOKUP, INDEX MATCH, Pivot Tables, Conditional Formatting, SUMIFS, COUNTIFS and dashboard creation.

Power BI

Data Cleaning, Power Query, Data Modeling, DAX, Measures, KPIs, Charts, Slicers and interactive dashboards.

Python

Python fundamentals, Pandas, NumPy, data cleaning, data manipulation and exploratory data analysis.

Tableau

Interactive dashboards, calculated fields, filters, parameters, charts and data visualization.

Linux

Linux commands, file management, permissions, users, processes, shell and basic system administration.

Git & GitHub

Repository management, commits, branches, merging, GitHub repositories and version control.

Docker

Docker images, containers, Dockerfile, port mapping, container management and application deployment.

AWS

AWS EC2, Security Groups, cloud deployment, server configuration and basic AWS infrastructure.

MY PROJECTS

Data Analytics & DevOps Projects

01

HR Analyst Dashboard

Developed an interactive HR Analytics Dashboard using Power BI to analyze employee data, workforce trends, attrition, employee demographics and key HR performance indicators.

Employee Analysis · Attrition · KPIs · Power BI

Power BI · DAX · Power Query · Excel

02

Car Sales Dashboard

Created an interactive Car Sales Dashboard using Power BI to analyze sales performance, revenue, vehicle models, sales trends, customer information and regional performance.

Sales Analysis · Revenue · Trends · KPIs

Power BI · DAX · Data Modeling

03

Blinkit Dashboard

Built an interactive Blinkit Sales Dashboard using Power BI to analyze outlet performance, product categories, sales, customer ratings, outlet types and business trends.

Sales Analysis · Outlet Analysis · Products · KPIs

Power BI · Power Query · DAX

04

Dockerized Portfolio Website

Developed a responsive portfolio website using HTML and CSS and containerized it using Docker. The application is designed to be deployed on an AWS EC2 server using Nginx.

Containerization · Nginx · AWS EC2 · Deployment

HTML · CSS · Docker · AWS

05

Blood Bank Management System

Developed a full-stack Blood Bank Management System with React frontend, Spring Boot backend and MySQL database to manage donors, requests and blood bank information.

Donor Management · Authentication · REST APIs · Database

React · Spring Boot · MySQL · AWS

06

SQL Data Analysis

Performed SQL-based data analysis using joins, CTEs, subqueries, window functions and aggregations to generate business insights from structured datasets.

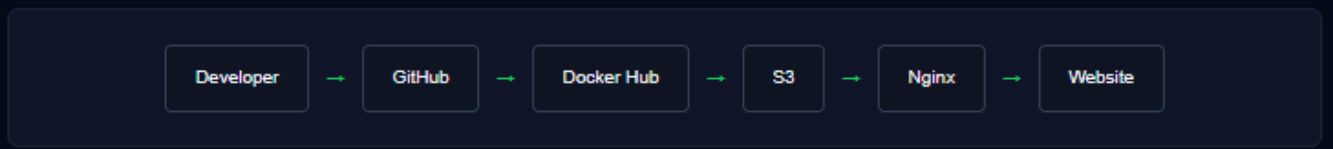

Data Analysis · SQL Queries · CTE · Window Functions

SQL · MySQL · Data Analysis

DEVOPS WORKFLOW

How This Website Is Deployed

01 **Code** HTML & CSS → 02 **Git** GitHub → 03 **Docker** Build Image → 04 **Docker Hub** Push Image → 05 **AWS EC2** Deploy

GET IN TOUCH

Let's Connect

I am open to opportunities in DevOps, Data Analytics, Business Analytics and related technology roles.
